CODE:

```csharp
public partial class MainMenu : Form
{
    public MainMenu()
    {
        InitializeComponent();
    }

    // Methods to link to other forms created here
    private void LinkToAdresses()
    {
        Address address = new Address();
        address.ShowDialog();
    }

    private void LinkToCustomers()
    {
        Customer customer = new Customer();
        customer.ShowDialog();
    }

    private void LinkToFreight()
    {
        Freight freight = new Freight();
        freight.ShowDialog();
    }

    private void LinkToDrivers()
    {
        Driver driver = new Driver();
        driver.ShowDialog();
    }

    private void LinkToStatus()
    {
        Status status = new Status();
```

```csharp
    status.ShowDialog();
}

private void AppExit()
{
    Environment.Exit(0);
}

// Methods then used in each button
private void AddressBtn_Click(object sender, EventArgs e)
{
    LinkToAdresses();
}

private void CustomerBtn_Click(object sender, EventArgs e)
{
    LinkToCustomers();
}

private void FreightBtn_Click(object sender, EventArgs e)
{
    LinkToFreight();
}

private void DriversBtn_Click(object sender, EventArgs e)
{
    LinkToDrivers();
}

private void StatusBtn_Click(object sender, EventArgs e)
{
    LinkToStatus();
}

private void ExitBtn_Click(object sender, EventArgs e)
{
    AppExit();
}
```
